

GO2A Brake Lathe

On / Off Car Brake Disc Lathe

Professional Brake Disc Resurfacing – On or Off the Vehicle

The 602A is a dual-function brake disc lathe designed for both on-car and off-car resurfacing. Built for workshops that demand accuracy, speed, and reliability, this machine delivers smooth, vibration-free braking performance in just minutes.

With dual-side cutting and precision engineering, the 602A restores brake discs efficiently while reducing labour time and increasing workshop profitability.

Technical Specifications

Working height	50 - 1200 mm
Rotation rate	120 rpm
Weight	135kg
Ambient temperature range	20 - 50 degress celcius
Voltage	220v
Maximum disc diameter	510 mm
Cutting accuracy	0.01 - 0.00mm
Maximum disc thickness	43 mm
