

Rim Straightening Machine

MT5750

MAGTEK
RIM REPAIR EQUIPMENT

Optional Polisher

The MAGTEK MT5750 Rlm Straightening Machine is used to correct defective rims/mags. It corrects and levels the wheels and makes the surface smooth using the lathe. The lathe unit is designed to remove excess welding sections from the repaired wheel surface. The MT5750 features a bridge-support frame that makes approaching the wheel from different angles easy and stable. The MT5750 also features variable speed control on the spindle motor for safer and more precise using of the lathe. (Optional polisher available)

Technical Specifications

Wheel repair range	10 - 26 Inch
Tool Post	4
Speed Range of Spindle	0 - 500 r/min
Working pressure	15 Mpa
Hydraulic Motor Power	1.5 kw
Spindle motor power	750 W
Power supply	220 V
Weight	350 kg
